

## Digital TV with QAM Tuner Channel Scan Procedure

**Please Note:** All TV manufacturers differ, so menu options, wording and other items may vary. The best way to complete the channel scan is to refer to the TV owner's manual. If that is not available, try the following general instructions:

1. Locate the TV remote control
2. Go to **Menu** or **Settings**
3. Locate **Channels** or **Set Up**
4. Most digital TV sets have a scanning function typically called **Auto Program, Channel Scan** or some similar combination
5. Find the scan function in the on-screen menu and start it
6. You probably will see a progress bar that shows the number of channels found. A scan can take as long as 45 minutes depending upon the TV set, so please be patient
7. When finished, the TV will have found all of the available channels as well as disposed of those no longer available
8. The TV set will then remember the new channel lineup from this point forward
